DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The abstract of the disclosure is objected to because it is too long. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 U.S.C. § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1 through 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to claim 1 as written, for example, it is not clear to which element the indeterminate pronoun "its" in lines 22 and 27 refers, thereby rendering indefinite claim 1 and all claims depending therefrom. Recommend replacing "its" with a direct recitation of whichever element is referred to thereby.

Claims 4 and 5, for example, appear to recite both an apparatus and a method of making the same, thus rendering the claims indefinite.

Application/Control Number: 09/886,534 Page 3

Art Unit: 3743

The limitations in claim 6 beginning with "a door plate" and going to the end of the claim are not readily comprehensible as written.

With regard to claim 7, for example, it is not clear to which element or elements the term "therefrom" in line 13 appears, thereby rendering indefinite claim 7 and all claims depending therefrom.

Claim Rejections - 35 U.S.C. § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 7 through 9 and 11 through 13 are rejected under 35 U.S.C. 102(b) as being anticipated by *Takesita et al.*

Takesita et al. discloses a vehicular air conditioner essentially as claimed, including,: three chambers; a first heat exchanger 14; a second heat exchanger 16 with a conduit connected thereto [see Figures 3 and 4]; a door 22, for example; and partitions separating the chambers.

The reference thus reads on the claims.

Claim Rejections - 35 U.S.C. § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 09/886,534 Page 4

Art Unit: 3743

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

8. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over *Takesita et al.* in view of *Tsuihiji et al.* (of record).

Takesita et al. discloses a vehicular air conditioner essentially as claimed, the air conditioner comprising three chambers, two heat exchangers, and a door 22, for example., Takesita et al., however, does not specifically disclose the door 22 as being arcuately curved. Nevertheless, it is well-known in the art to have doors in vehicular air conditioners be of any one of a wide variety of shapes, including arcuately curved, as taught by Tsuihiji et al.--see door 8, for example. Furthermore, absent a showing of criticality and unexpected results, changing the shape of an element is generally not inventive. See In re Dailey, 149 USPQ 47 (CCPA 1976).

Therefore, it would have been obvious to one skilled in the art at the time of invention to modify the air conditioner of *Takesita et al.* by making door 22 or another one of its doors arcuate as taught by *Tsuihiji et al.* in order to decrease the amount of unused space within the air conditioner case, for example, and thus make the air conditioner more compact.

Allowable Subject Matter

9. Claims 1 through 6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Application/Control Number: 09/886,534

Art Unit: 3743

Conclusion

Page 5

10. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. Danieu, Denk et al., Takasaki, and Lee each discloses a vehicular air conditioner

designed for compactness

11. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Liiliana (Lil) V. Ciric, whose telephone number is (703) 308-3925. While

she works a flexible schedule that varies from day to day and from week to week, Examiner Ciric

may generally be reached at the Office during the work week between the hours of 10 a.m. and 6

p.m. ET.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Henry Bennett, can be reached on (703) 308-0101. The fax phone number is (703) 305-3463.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the Group receptionist whose telephone number is (703) 308-0861.
